Programacion C#

```
Parte A
Programa 1
using System;
using System.Collections.Generic;
using System.Ling;
using System.Text;
using System.Threading.Tasks;
namespace Operadores_aritmeticos
class Program
  static void Main(string[] args)
    {
      //Operadores aritmeticos
    double num, pot, resultado;
    Console.WriteLine("Digite el numero que quiere elevar: ");
    num = Convert.ToDouble (Console.ReadLine());
    Console.WriteLine("Digite a la potencia que quiere elevar: ");
    pot = Convert.ToDouble(Console.ReadLine());
    resultado = Math.Pow(num, pot);
    Console.WriteLine("el resultado es:" + resultado);
    Console.ReadKey();
 }
}
Metodo 1
using System;
```

```
using System.Collections.Generic;
using System.Ling;
using System.Text;
using System.Threading.Tasks;
namespace Operadores aritmeticos
class Program
  static void Main(string[] args)
      //Operadores aritmeticos
  short[] values = { Int16.MaxValue, 10328, 0, -1476, Int16.MinValue };
  foreach (short value in values)
{
 try {
   Console.WriteLine($"Abs({value}) = {Math.Abs(value)}");
 catch (OverflowException) {
   Console.WriteLine("Unable to calculate the absolute value of {0}.",
             value);
 }
}
 }
Metodo 2
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;
using System.Threading.Tasks;
namespace Operadores_aritmeticos
class Program
  static void Main(string[] args)
```

```
double[] doubles = { Double.MaxValue, 16.354e-17, 15.098123, 0,
           -19.069713, -15.058e18, Double.MinValue };
foreach (double value in doubles)
 Console.WriteLine($"Abs({value}) = {Math.Abs(value)}");
 }
}
}
Parte B
using System;
using System.Collections.Generic;
using System.Ling;
using System.Text;
using System.Threading.Tasks;
namespace Operadores
{
  class Program
  static void Main(string[] args)
    {
      //Operadores logicos
    double peso;
    Console.WriteLine("Digita tu peso: ");
    peso = Convert.ToDouble(Console.ReadLine());
    Console.WriteLine("Digita tu edad: ");
    edad = Convert.ToByte(Console.ReadLine());
    Console.Clear();
    if(peso > 100 \&\& edad >= 15){
      Console.WriteLine("Tu peso es normal");
    Console.ReadKey();
  }
}
```
